

Coronavirus Update – March 20, 2020

The Town of Delisle is not immune to what is happening around the world. What many had believed would never get here is now right on our doorstep. In keeping with directives from both the federal and provincial governments, we encourage our residents to practice “social distancing”, that is, staying at least 2 meters apart when engaging in conversation with other people face to face. “Social isolation” is highly recommended as well, meaning that, unless absolutely necessary, staying in your homes or your place of business and not interacting face to face with other people unless absolutely necessary.

If you are experiencing any of the coronavirus symptoms, please stay in your home and phone the Health Line at 811. They will provide you with advice as to how to proceed. In the meantime, please self-isolate or self-quarantine yourself so the virus is not passed on to others.

For those returning from out of the country, it is imperative that you self-isolate for the 14 day period as recommended. Although you may not be experiencing any symptoms, you could still be a carrier of the virus and able to transmit it to other people.

Our world has changed an incredible amount in the last week. We each have a social obligation to keep this pandemic under control.

Thank you for your co-operation.
